

Hi. We are Nortec®, and we are responsible for servicing your laundry. This means that we take care of you and the machines in the laundry. It is as simple as that. We call it TotalCare™, and our goal is to make your everyday life easier - and more sustainable. You save time, money and spare the environment while contributing to the social community when you use a laundry.

The laundry must be a comfortable place to stay, the machines must deliver the very best washings and they must be easy to operate. Should you, at any time, need our help, you are always welcome to contact us. Happy washing.

Welcome in the laundry
